

# Meshed Topology In Oil & Gas Field Networking

# SkyWire™ Oil and Gas

Supervisory Control and Data Acquisition

# SKYWIRE :-

## *Simple Modular Expandable Design :-*

- TDMA: “True” Full Mesh, Hub and Spoke, Point to Point or Hybrid Networks
- Best TDMA Bandwidth Efficiency in the Industry
- Unsurpassed Packet per Second Throughput
- Fastest response time - Single-Hop BW allocation
- No High Cost Hub or External Server Required
- No Central Clock or GPS Required
- No Extensive Training Required to Operate
- Up to 32 Remotes connected in True Mesh with a single 1RU Box
